Our Philosophy

Each project is unique with very specific goals and measures; you can expect the exact same from our approach. Whether your project is large or small, new or ongoing, MyPorter has a service or solution for you. We execute projects with quality and integrity – on time and on budget.

CORE OFFERINGS:

Atlanta Product Disposition Scoring

When product returns spike, it's incumbent to understand which product can be resold, which product can be refurbished, and what product needs to be liquidated. Porter Logistics can work with you to create, or use your existing, product disposition categorization and sort product appropriately.

Atlanta Liquidation & Value Capture

Product that is not suitable to be resold to the US market can nonetheless still provide value to your Atlanta reverse logistics organization. Porter Logistics has relationships with vendors both inside the US and abroad who will take product in any condition. Turn your trash in to cash.

Efficiency Critical to Reverse Logistics Value Capture

Given the reduced margin involving reverse logistics in Atlanta, Porter Logistics deploys a ready-made process and offers various levels of service to best accommodate your financial profile. We are willing to be as granular, or generalized, based on your requirements.

Flexible Terms and Speed to Contract

At Porter Logistics, we believe in flexibility. Month to month or a fixed contract, we're happy to work within your constraints. Our SOW's are typically one page or less, negotiation process to final signature often takes less than 24 hours.

CASE IN POINT

Data Center Battery Company Uses Porter Logistics for Atlanta Reverse Logistics

The Challenge

A nation-wide battery company serving the technology data center market needed a full-service partner who could bring them an end-to-end solution. The client needed to 1) ship new batteries to be installed directly to Porter Logistics Atlanta reverse logistics distribution center 2) deliver product on-site in a specific sequence 3) pickup used batteries and score them appropriately based on their pre-developed rubric.

How we Helped

Porter Logistics provided a multi-faceted solution, receiving multiple truckloads of highly sensitive batteries that needed to be categorized and parceled out to multiple data center projects. Porter Logistics then used its dedicated fleet to distribute and then bring used batteries back to the Porter Logistics Atlanta DC to be scored as "recycle," "refurbish," or "liquidate." Our Atlanta reverse logistics team scored every single product coming back from the data centers before ultimately distributing them back to the appropriate parties involved.

Results

Porter Logistics technology platform allowed the client to have a clear picture of what inventory was in the Porter Logistics DC and the disposition scoring of all reversed product in Atlanta. As a result of the performance, we have transitioned the engagement from project-based to an ongoing agreement. Porter Logistics has executed a version of this project no less than six times (and counting) at the time of this writing.

"Historically, we used multiple providers for these kinds of projects, at great expense and difficulty. Centralizing all aspects with Porter Logistics has reduced great expense and a huge headache" - VP Logistics
