ATLANTA PHARMA GRADE WAREHOUSING & LOGISTICS

CORE OFFERINGS:

Atlanta Pharmaceutical Warehouse Environmental Controls

Controlling for temperature and humidity are essential for any cGMP program for pharmaceutical API's (active pharmaceutical ingredients) and finished products. Porter offers temperature controlled, refrigerated, and frozen warehouse rooms with electronic temperature and humidity digital reporting so you have peace of mind

Extensive cGMP (Current Good Manufacturing Practices) Quality Program

Porter Logistics in-house quality team is focused daily on ensuring that Porter has the proper quality management systems, robust operating procedures, and detailed chain of custody on environmental controls to meet the demanding nature of the pharmaceutical industry

Atlanta Pharmaceutical Logistics & Fulfillment

Porter's extensive partner network can execute order fulfillment into hospital systems, industrial manufacturers, and end users - ensuring end to end cold chain compliance along the way

Choose the Best Pharma Grade Warehouse in Atlanta

Sub-par handling and storage of your product can result in damage to your brand and your business. Federal Regulation violations can disrupt your supply chain and expose you to heavy penalties.

Choosing Porter as your Atlanta 3PL partner safeguards against costly fines and demonstrates commitment to your customers and your reputation

CASE IN POINT

Multinational Chemical & Pharmaceutical Distributor Use Porter Logistics for Pharmaceutical Grade Storage, Order Fulfillment, and Distribution in Atlanta

The Challenge

One of the largest pharmaceutical and chemical distributors in the world needed Atlanta pharma-grade distribution and fulfillment for large quantities of Active Pharmaceutical Ingredients (API's) that it was selling to its customers. The requirements were complex: some products required ambient storage while others required end to end cold chain compliance with programmatic humidity tracking. This customer already used Porter Logistics for chemical and Hazmat warehousing at a different location and needed a pharmaceutical grade warehouse solution in Atlanta. Porter's client fervently wanted to consolidate both dry as well as the cold chain and needed a provider with a strong cGMP quality plan to assist.

How we Helped

Porter Logistics dove right into the requirements, analyzing the various chemistries of the Active Pharmaceutical ingredients (API's) to determine a proper storage segregation strategy as cross-contamination is a huge risk in the cGMP (Current Good Manufacturing Practices) framework. Porter also needed to provide documentation of temperature and humidity across the lifecycle of the product. After proposing and client acceptance of the quality plan, Porter Logistics sprang into action.

Results

The client was extremely happy with the ability to consolidate their chemical and pharmaceutical grade warehousing into adjacent Atlanta warehouses all under the Porter Logistics umbrella. Porter's ability to offer full cold-chain services for sensitive API's was an absolute game changer – yielding enormous efficiencies and increases in quality of services.

"We're on our 3rd expansion with Porter Logistics - this time into pharmaceuticals. These guys keep impressing"

Senior Director Logistics - Atlanta
